

Rabbifile - Fur Your Information

Digital

The Rabbifile app interface on a smartphone screen. At the top left is the RABBITAS logo. Below it is a green header bar labeled "Rabbits Profile". The main content area features a large photo of a French Lop rabbit named Lily. To the left of the photo is a "Rabbits Profile" section with five cards: Lily (French Lop, adopted March 21/20), Bell (Dileenaar, adopted March 21/20), Eric (American, adopted March 21/20), and Shelly (Alaska, adopted March 21/20). To the right of the photo is a detailed profile for Lily, including her age at arrival (2 years), arrival date (March 21/20), fur color (light brown and white), and litter training status (Yes). Below this is a "What I'm like" section with three icons: a leaf for "Likes to eat lettuce", a rabbit for "Likes to run around in a large space", and two people for "Good with kids". Further down is a "My Story" section with a book icon, detailing her history of being raised by a family who couldn't care for her due to moving, and being adopted by Rabbitas. Finally, there is a "Medical History" section with a syringe icon, noting she was neutered and has had dental issues.
